| <input type="checkbox"/> Vestibular Diagnostics *(see below)* | <input type="checkbox"/> Vestibular Therapy | <input type="checkbox"/> Repositioning maneuvers for BPPV:
(Select one) Right Left Both |
| <input type="checkbox"/> Concussion Testing/Therapy | <input type="checkbox"/> Fall Risk Training | |
| <input type="checkbox"/> Facial Retraining | <input type="checkbox"/> Visual Retraining | |

Referring Provider's Signature: _____ Date: _____

***Vestibular Diagnostics Include:**

- Videonystagmography (VNG)** evaluates how the inner ear and brain contribute to eye movements to assess for peripheral and/or central vestibular dysfunction.
- Acoustic Brainstem Response (ABR)** measures how sound moves from the ear along the hearing nerve to the brain to rule out retrocochlear pathology (please specify on order if requesting threshold ABR)
- Electrocochleography (ECoG)** helps identify hydrodynamic (fluid) disorders of the inner ear.
- Vestibular Evoked Myogenic Potential (VEMP)** measure function of the otolith organs (utricle and saccule) and superior and inferior vestibular nerves.
- Computerized Dynamic Posturography (CDP)** measures postural sway under a variety of sensory conditions and automatic reflexes to unexpected perturbations.
- Video Head Impulse Test (vHIT)** measure how well the eyes and inner ears work together and assesses function of the semicircular canals.
- Comprehensive Audiogram** assesses middle ear function and diagnoses sensorineural and/or conductive hearing loss.

ABR, ECoG and VEMP tests require an audiogram, please fax if already performed

360 Balance & Dizziness Center

Medical Referral Form

What insurance does 360 Balance & Dizziness accept?

- We are in-network for Medicare and many major providers
- We accept limited plans of workman's compensation, please call for details
- We have payment plans available and will accept sliding payment scale in special circumstances
- Some insurance plans will cover only physical therapy or only diagnostic testing, please call your insurance provider to check what will be covered under your specific insurance plan

What type of medical referral do patients need?

- Medical order to read: 'evaluate & treat'
- Our case manager will identify appropriate services, or you may individually check our specialty services as noted on other side of referral form

How can your clinic easily provide necessary medical order information?

- Fax referral, patient contact, insurance info and other pertinent medical records. **Note: previous hearing test or vestibular diagnostics are especially helpful as are the referring provider's notes. Fax to 512-345-6150**
- Handwritten script, delivered by patient, can also be accepted but needs to be received prior to scheduling patient

How soon can patients be seen?

- Within 1-2 weeks, non-emergency evaluation.
- Provider can call for urgent cases related to dizziness, hearing loss and/or concussion.
- Note: Our patient population is 14 years old and older. Requests can be made for individuals younger than 14 years of age.

Thank you for your referral. Your trust is very much appreciated.

*"Alone we can do so little; **together** we can do so much."*

-Helen Keller
